## **Hai Kang Life Announces Extension on ISO 17025 Laboratory Accreditation by Hong Kong Government**

Hai Kang Life Corporation Limited, pioneering researcher and developer of biotechnology applications and systems in addressing safety and quality assurance for industries and global health has been awarded extension of ISO 17025 accreditation from Hong Kong Accreditation Service (HKAS). The scope of Hai Kang Life's laboratory accreditation (HOKLAS registration number 136) has now been expanded to include certification in Microbiology analyses and testing in the food category.

*"This achievement marks a valuable addition to the accomplishments of Hai Kang Life in delivering advanced molecular testing analysis for the food industry at the regional and international levels,"* comments Dr Terence Lau, Chief Operating Officer.

The capability of Hai Kang Life to combine both conventional microbiological techniques and innovative new technologies provides a unique and wide selection of system solutions for food safety and quality testing. With food supply network and safety regulations increasingly worldwide, the testing spectrum and matrix offered by Hai Kang Life brings unmet solutions to addressing continual challenges in producing safe and quality foods and in meeting consumer needs.

Hai Kang Life became the first commercial laboratory in China-Hong Kong accredited with ISO 17025 for genetically modified food molecular testing and analytics using real-time PCR technology. The Company was also the first commercial service laboratory to apply molecular technology in pathogen detection of food viruses and bacteria, and has since grown to become one of Asia-Pacific's prime food and product safety testing reference center, fueled by the Company's owned subsidiary, The Food Safety Laboratories Limited (TFSL).

TFSL takes a high priority approach to customer service in the global food industry; bringing Hai Kang Life's innovation, technology, quality and diverse portfolio of food testing programs and analytical services to the domestic and world markets.

#### **About The Food Safety Laboratories Limited (TFSL)**

The Food Safety Laboratories Limited (TFSL) based in Hong Kong and Beijing-China, utilizes the most advanced DNA-based technology and positioned to be the total food solutions provider. With a team of world-class molecular biologists and internationally renowned scientists, we offer a comprehensive range of testing services including microbiology, rapid and advance molecular testing as well as special testing in food viruses. Our capabilities include but are not restricted to GMO, food allergen, species identification, food safety and certification services for the food industry and global supply chain. TFSL's parent company, Hai Kang Life Corporation Limited is the only commercial GMO testing laboratory in Hong Kong and China accredited with ISO/ IEC 17025 and ISO 9001.

#### **About Hai Kang Life Corporation Ltd**

The vision of Hai Kang Life Corporation Limited (HKLife) is to be the world's leading biotechnological company in molecular diagnostics – growing the Asian biotechnology industry in a globally competitive manner. HKLife was established in 1999 and it is strategically positioned at the hub of Asian biotechnology with the most advanced technologies and a team of world-class molecular biologists.
